

Great Place to Work® Award

Accuracy jumps to second place on the list of the best workplaces in France

Neuilly-sur-Seine, March 26, 2009

For the first time since its foundation, Accuracy has competed for a place on the list of "the best workplaces" in France organised by the *Great Place to Work*® Institute. The company earned a place among the Gold Prize-winners, and took second place in the overall ranking.

The seventh edition of the *Great Place to Work*® awards has published its list of prize-winning companies, the "Best Workplaces" in France. Out of the 109 companies taking part, 30 companies were rewarded for the innovative policies they have adopted on behalf of their employees.

Accuracy, which was taking part in the competition for the first time, was awarded second place in the overall ranking, which, based on the *Great Place to Work*® model and by means of a detailed questionnaire, seeks to highlight "*Companies in which you trust your managers, are proud of your work, and enjoy working with your teammates.*"

Accuracy has launched numerous initiatives making it a model innovative company. These measures include:

- An active and ongoing internal communication and information policy,
- Staff involvement in the company's business plan (the participative approach),
- Employee-designed modular training solutions,
- Training seminars that focus on "interpersonal skills" such as cultural understanding, public speaking, listening skills, etc
- Encouraging transparency, high ethical standards, and out-of-the-box thinking,
- Structuring a highly motivating profit-sharing scheme.

The company's much cherished place in this ranking is a source of great pride for the partners who founded Accuracy a few years ago. As Accuracy's CEO Frédéric Duponchel explained, "*Founded just four and a half years ago, Accuracy has expanded quickly based on a bedrock of powerful human values and experiences that we continue to stand behind with utmost sincerity. This ranking confirms the relevance and success of our model and its values, such as consultants achieving a high degree of personal and professional fulfilment, helping them to guarantee excellence for our clients.*"

Accuracy employs 120 consultants, including 80 in Paris and is emerging as one of the market's key players. Its offices are located in Paris, Madrid, Amsterdam, Milan and Frankfurt.

Accuracy has developed a new model in financial consultancy services. The company undertakes "tailored" assignments in the corporate finance field, and does not intervene in regulated professional activities (auditing or public accounting, etc). Accuracy's areas of expertise include transaction support, support with dispute resolution and litigation, in addition to assessments and valuations.

Accuracy is jointly owned by its partners and the Aon group, the world leader in Consultancy & Brokerage services (listed on the NYSE).
